

Infinite Opportunities. One Address.

1221 AVENUE
OF THE
AMERICAS

Midtown at Its Best

Welcome to 1221 Avenue of the Americas, where a distinguished architectural design meets 21st-century aesthetics. An extensive modernization of the lobby (2016) and plaza (2023) have reenvisioned the office experience for today's talent.

1221 Avenue of the Americas' central location within Midtown Manhattan ensures an easy commute, whether you're traveling by road, rail, or water.

Contemporary lobby

with serviced reception area and floor-to-ceiling glass

Upgraded infrastructure

new elevator cabs and systems including destination dispatch, state-of-the-art broadband capabilities, in-house DAS services, Wired Certified Platinum, and LEED Gold

Expansive floor plates

50,000-80,000 RSF office floors accommodating a range of occupants

Effortless commute

direct access to 4 subway lines, 3 additional lines within one block, rail and bus terminals, and the commuter ferry between NY and NJ

Experience Excellence on Every Level

Sustainability Highlights

Certifications

1221 Avenue of the Americas has been recognized with several prestigious certifications for its commitment to occupant health, connectivity, and environmental sustainability:

ENERGY STAR CERTIFICATION

Awarded for superior energy efficiency, placing the building in the top 25% of comparable office properties, while also reducing operating costs.

BOMA 360

Recognized for enhancing property value through outstanding management and operational excellence.

LEED GOLD

Granted for sustainable design, which improves asset appeal by reducing environmental impact and operational expenses.

WIREScore PLATINUM

Acknowledged for delivering future-proof digital connectivity, providing tenants with access to some of the fastest internet speeds in NYC.

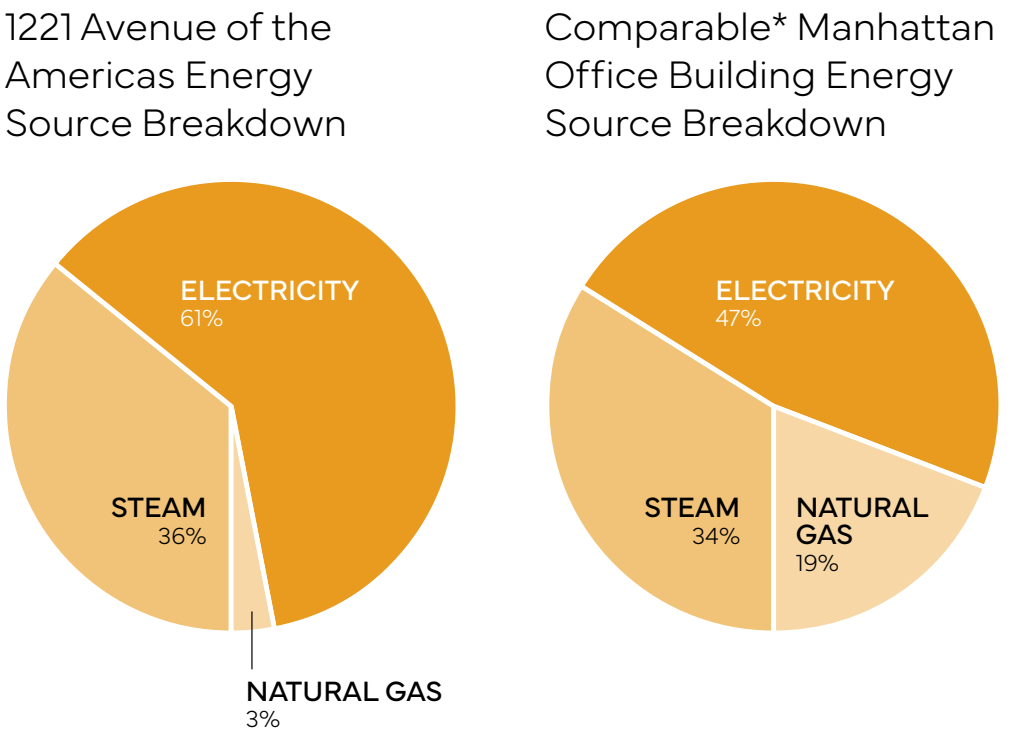

FITWEL 1 STAR

Commended for fostering a healthier workplace environment, boosting employee productivity and well-being.

Optimizing Energy

1221 Avenue of the Americas’ modernized infrastructure, energy-efficient systems, and building automation systems optimize the building’s energy usage by relying more on electricity. This allows the building to consume natural gas at a rate starkly lower than average, implement sustainable energy options, reduce its carbon footprint, and aid in compliance with Local Law 97.

COMPARABLE MANHATTAN OFFICE BUILDINGS USE 16% MORE NATURAL GAS AS AN ENERGY SOURCE THAN 1221 AVENUE OF THE AMERICAS.

*Comparable Buildings: Office buildings greater than 1M SF located in Manhattan.

Ongoing Initiatives

Rockefeller Group is continually improving the operations of 1221 Avenue of the Americas, ensuring that sustainability remains a core focus of the building's management.

Recently completed and current projects include:

- New BMS system installed in 2024, equipped with energy optimization procedures.
- Air Handling Unit (AHU) upgrade with energy efficient controls. Once installed, the AHUs will be equipped with Healthway Filtration, bringing the building air filtration to near hospital-grade levels.
- Improved steam controls to reduce consumption.

Rockabees

At 1221 Avenue of the Americas, we’ve enhanced urban biodiversity by installing beehives on our eighth-floor setback. Our bees pollinate plants across the city, helping to clean the air and supporting the growth of community gardens throughout Manhattan.

- The building has three beehives, housing approximately 120,000 bees.
- Each hive can pollinate millions of flowers, benefiting community gardens, street trees, and green roofs within a three-mile radius. Our bees even fly to the top of Central Park and back!
- Our hives yield up to 40 pounds of hyperlocal honey per season.
- Because our beehives are located in the city, our bees have access to greater biodiversity, resulting in a more varied diet and stronger immune systems — urban bees are healthier and more productive.

Sustainability Highlights

- **Air**
 - HVAC systems are equipped with MERV-15 filters that capture airborne particles, exceeding NYC Energy Code Requirements.
 - Mechanical systems increase the supply of outdoor air and continuously cycle fresh, filtered air throughout the building.
 - Base building air quality assessed for indicators such as carbon dioxide, particulate matter, temperature, humidity, and more.
- **Recycling**
 - The building has a robust waste management program with a diversion rate 12% higher than comparable buildings.
 - Periodic waste audits conducted to identify areas for waste diversion improvement and development of corrective action plans.
 - Complimentary e-waste pick-up and color-coordinated recycling procedures minimize waste sent to landfills.
- **Water**
 - Existing base-building toilets, urinals, faucets, and showers have been upgraded with low-flow fixtures, performing 20% above code requirements.
 - Building engineers review water logs to compare trends and identify potential water loss.
 - The cooling towers are disinfected 2 times per year, legionella testing performed quarterly and bacteria testing is performed weekly.
- **Tenant Collaboration**
 - Best practices shared with tenants to optimize sustainability through annual sustainability town hall.
 - Aid and support tenants in purchase of renewable energy credits and pursuit of certifications such as LEED and ENERGY STAR.
 - Sustainability reporting of emissions, energy, water, and waste shared with tenants.
 - Walkthroughs and audits offered to tenants to identify potential energy saving and recycling improvements.
- **Building Health & Safety**
 - The building is Fitwel Certified, a third-party verification of our operational and maintenance protocols.
 - Janitorial staff conduct high frequency cleaning and sanitization using green cleaning products.
 - Coordinated training on emergency preparedness, workplace safety, and response drills.
- **Energy**
 - The building is LEED Gold and ENERGY STAR certified (Top 25% performance for energy efficiency).
 - LED lighting systems installed throughout building common areas to increase energy efficiency.
 - Building systems commissioned to ensure lower energy consumption and operating expenses.
 - The building has a robust capital plan to reduce energy through initiatives such as replacing all of the Air Handling Units (AHU) in the building.
- **Sustainable Transportation**
 - Complimentary bike parking and shower facilities for tenants.
 - Building walk and transit score of 100.
 - 15+ subway and bus lines within walking distance (5-10 minutes):
 - Subway: 1, B, D, E, F, M, N, Q, R, W.
 - Bus: M5, M7, M20, M31, M51, etc.

Building Specifications

Address

1221 Avenue of the Americas, New York, NY 10020

Location

Midtown Manhattan, in Rockefeller Center on Sixth Avenue

Year Built

1972; Renovated 2016

Architect

Harrison & Abromovitz & Harris

Building Measurements

Size: 2.6MM RSF
Site: 103,000 SF (2 acres)
Height: 674'
Frontage: ~200' on Sixth,
~500' on W 48th,
~525' on W 49th

Floors

51 floors above grade; 5 floors below grade

Base Floor 2: ~40,000 RSF
Base Floors 3-7: ~80,000 RSF
Tower Floors 8-50: ~48,000 RSF

Floor Loading

50-150 lbs. live load

Slab-to-Slab Height

Base Floor 2: 17'
Base Floors 3-7: 12'-4"
Tower Floors 8-48: 12'
Tower Floors 49-50: 18'-19'-1"
Plaza Level: 13'-1"
Lower Level 2: 13'-3"
Lower Level 3: 23'-2"
Lower Level 4: 20'-1"
Lower Level 5: 13'-1"

Structure

Steel framed with cellular steel flooring and composite concrete deck

Typical Dimensions

Window Module: 2'-10.5"
Column Spacing (W-E): 30' on center
Window to Core (W-E): 68'
Window to Core (N-S): 36'

Vertical Transportation

32 passenger cabs
3 freight elevators (14' high)
1 shuttle car
11 escalators

Loading Dock

Located on W 48th Street; contains two hydraulic trucklifts (60,000 lb. capacity each).
13' H x 11' W x 49' D

HVAC

A central chilled water plant comprised of one steam turbine chiller, one steam turbine with parallel electric drive, and one electric drive chiller. Perimeter zones are served by an induction system; interior zones are served by a variable air volume system.

Electricity

Six watts demand load per USF. Additional capacity may be available based on demonstrated need at tenant's cost. Sub-metered. Nine electric services, five on C3, four on 36th floor, fed from multiple Con Edison high-voltage feeders.

Telecommunication

Wired Certified Platinum; multiple POE's and diverse risers; 12 carriers and in-building DAS system to boost cellular reception.

Sustainability

LEED Gold certified

ROCKEFELLER
GROUP

About Rockefeller Group

Rockefeller Group develops, owns and operates extraordinary properties across the United States. For nearly a century, the company has delivered exceptional experiences and value creation through dedication to quality in the built environment. The company's portfolio spans the development of office, multifamily, industrial and mixed-use projects across six geographic regions as well as significant ownership interest in and management of approximately six million square feet of world-class office space in Manhattan.
